

Easypack®

packmaster™ pro

FROMM | PACKAGING SYSTEMS

innovative • green • packaging

A new generation of green packing technology

The all new packmaster™ pro is the most advanced void-fill packaging system available today. This innovative new solution combines the first generation technology of our market leading packmaster™ and packsolo™ systems, to offer a total packaging solution which delivers incredible versatility along with increased yields of up to 11%, taking packaging innovation to a whole new level.

Manufactured in the UK, packmaster™ pro offers outstanding performance, unrivalled flexibility and the highest levels of efficiency. The advanced system offers multiple packaging options through its clever technology, delivering a range of lightweight, robust paper cushions that can be easily moulded around any product, providing secure transit for the most delicate items through to heavy industrial goods.

Converts rolls of multiple grade 100% recycled single or twin-ply paper.

Programmable pack length and quantity combinations

packmaster™ pro

Greater choice, greater flexibility

The new packmaster™pro converts rolls of 100% recycled multiple grades of single or twin-ply paper at high speeds, creating robust, paper cushions that are up to 80 times the original paper roll volume.

The new control system allows users to pre-set 3 different pack lengths and quantity combinations and the new active foot switch offers users hands free control. New, high speed blade technology has cut the cycle time by half offering an increase of up to 35% more packs per minute.

Features

- New high speed blade halves cycle time
- Up to 35% more packs per minute
- Programmable pre-set paper lengths
- Converts multiple grade single or twin-ply paper
- Converts paper to 80 times its original volume
- Active foot switch control
- Quick paper loading system
- Set packing lengths for efficient use
- Ergonomic design
- Simple, user-friendly operation

Packmaster™Pro offers up to 11% more volume yield.

Rigid protection for lightweight or heavy goods.

Converts paper up to 80 times its original volume.

The system has also been streamlined to allow operators even greater flexibility of location which, combined with our small footprint roll pallets, minimises the need for valuable warehouse space.

Packmaster™pro is the ultimate sustainable solution for protective packaging, offering maximum efficiency and reliability, whilst allowing customers to achieve their sustainability targets.

packmaster™pro combines 25 years of packaging know-how to deliver the most advanced, sustainable technology for 21st century packing operations

Benefits

- 100% recycled, recyclable and biodegradable
- Up to 11% increase in volume yield
- Maximum protection for your goods
- Packs all goods – lightweight to heavy
- Total void-fill not necessary
- Convenient on-demand packaging
- Low running costs
- Easily fits into any packing area
- Deal direct with the manufacturer
- On-line ordering for next day delivery
- Dedicated account management

Technical information

Machine dimensions (mm)	(l)	1170
	(h)	1375 - 1575
	(w)	775
Machine weight (standard with frame)	148kg (approx.)	
Roll weight	16kg (average)	
Roll length	up to 450m	
Cushion width	up to 200mm	
Output volume	up to 2.5m ³	
Output speed	26m per min	
Usage	On demand	
Voltage	230V 1ph 50Hz	
Max power input	400W	

Paper options

Single ply or twin-ply grades from 52gsm up to 52/90gsm.

Popular grades are 70gsm and 52/70gsm

White and brown paper options
