

Overhead hopper system for decentralized applications for AP 100

Characteristics

Economic solution:

- Accessory for the Airpad models AP 100-200 and AP 100-400
- Basic design, very cost effective
- Easy to assemble

Universal, solution:

- Used for decentralized applications
- Space-saving solution for easy integration
- Useable in stand-alone configuration

Ergonomic solution:

- Ergonomic design for convenient air pad dispensing
- Easy roll change by conveniently and effortlessly lowering the machine by electric actuator
- Adjustable opening height for optimum operator comfort
- Three openings for single or multiple operators
- Automatic replenishment of the bin
- Start-Stop-button fixed on the mast. Can also be placed close to the operator with the optional box (AP1.0948)
- No noisy air ducting nor bower for a very silent operation

Technical specifications

Loading position: Height: 1.053/1.453mm – 41.4/57.2” (depending on adjustable mast height)

Extraction position: Height: 1.500/1.900mm – 59.0/74.8” (adjustable)

Extraction ports: 3

Filling volume: 0,5 m³ – 17.6 CuFt
