Our market presence

Primary Industries & Raw Materials

Construction & Infrastructure

Products & Goods

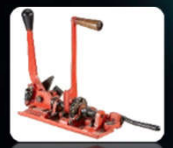

Manufacturing & Production

Trade & Distribution

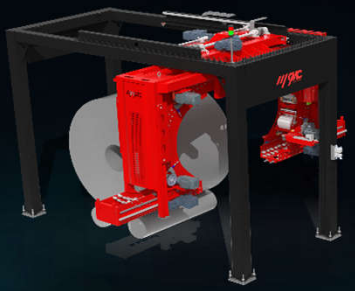

Our Journey at a Glance

1947 – 1975
Foundation Years

AFRO brand established

Innovative strapping tools and production growth.

1976 – 1996
Market Proximity

FROMM brand launched

Growing exports and distribution network.

1999 – 2009
International Rise

Global expansion

New strapping, Airpad® and wrapping solutions.

2010 – 2022
Global presence

Production across 4 continents

Acquisitions and innovative packaging solutions.

2022 – 2025
Continued growth

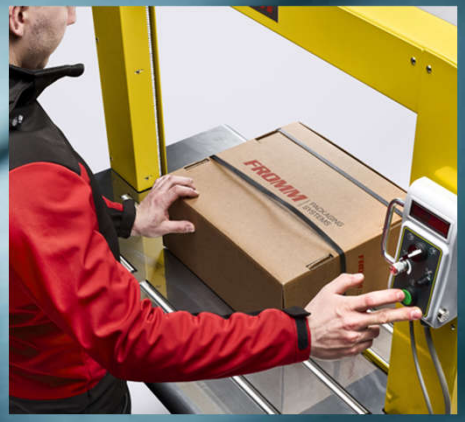

Expansion of and new production facilities
Acquisition of Maillis Metal Solutions and new technologies.

FROMM | STRAPPING SOLUTIONS

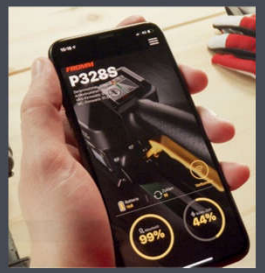

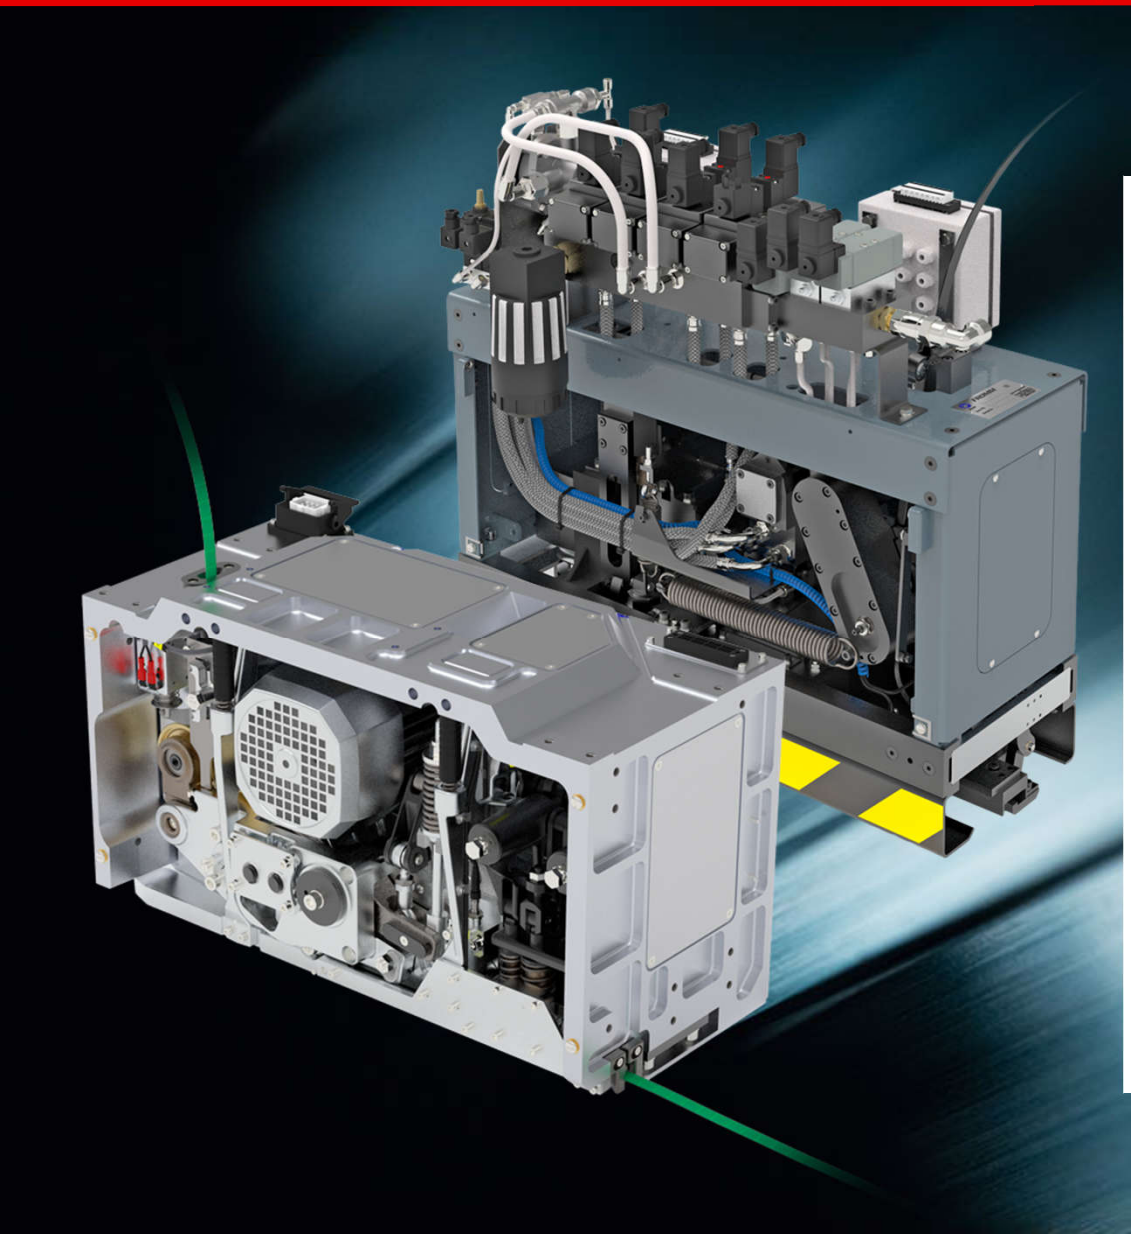

Strapping Tools

For Steel and Plastic strapping

- **P&A Series,**
  Manual & (Semi) Automatic strapping tools
- **Operation**: manual, pneumatic or battery powered
- **Versatility:** flat, round or narrow packs
- **Strap type:**
  - Steel (9,5–32 mm x 0,38–1,45 mm)
  - Plastic (9-32 mm x 0,35–1,05 mm)
- **Sealing methods:** with seals or seal-less
- **Control:** traditional or digital operation.

With the service app, your digital FROMM device is always up to date.

Strapping Heads

For Steel and Plastic strapping

- **Operation:** electric, pneumatic, hydraulic or a combination thereof
- **Versatility:** square, round, narrow, very low, narrow or irregular packs in all environments
- **Sealing:** Plastic: Sealless. Steel with or without seal (MicroLock™) or spotwelding
- **Efficiency:** High and consistent sealing performance with 9,5-32 mm x 0,4-1,53 mm
- **Maintenance:** Open, long-life design for easy service, long term intervals & fast exchange
- **Compatibility:** Easy to integrate into new and existing systems

Strapping machines

PM-series for light-weight PP-strap applications

- **Operation:** Manual, Semi- or Full-automatic (up to 65 cycles/min)
- **Strap:** PP strap (5–16 mm x 0,45–0,75 mm)
- **Sealing:** seal-less, heat seal technology. Bottom or side seal
- **Control:** mechanical or digital operation
- **Versatility:** for flat, round, or narrow packs (horizontal/vertical/cross strapping)
- **Integration:** stand-alone or in-line
- **Customization:** extensive number of options including, belt- or roller-transport, presses, turn-cross, optical and mechanical package sensors.

Plastic Strap Family

STARstrap® PET, QUICKstrap™ PP and UNIstrap™ Hotmelt & Composite polyester

- **Strap types:** wide choice of strap types, for general purpose or specific applications and performance
- **Performance:** Trouble-free processes, through combined use of FROMM tools and machines and consumables
- **Coils & Dispensers:** for all kinds of strap, coils, tools & machine applications and working conditions
- **Quality is our trademark:** good and consistent seal efficiency, high corner strength, excellent shock absorption and retained tension, is what we are known for.

Steel Strap Family

Dynaflex® Regular Duty,
Megadyn® High Strength & USLM High

- **Strap types:** Wide choice of strap types, for General purpose, High Strength and High Elongation applications. Secure shipment of goods for all types of industries and applications
- **Performance:** Trouble-free processes with hand FROMM tools as well as fully automated FROMM solutions
- **Coils & Finish:** Application oriented choice of Ribbon wound, Oscillated, Jumbo and Super Jumbo coils. Blank, Blued, Black, Zinc coated.
- **Dispensers & Seals** for any application, strap type, circumstance and application

- streng vertraulich -

FROMM | WRAPPING SOLUTIONS

Pallet Wrapping

Turn-table (FS), Arm wrappers (FA) & Self-propelling Robots (FR)

- **Operation:** OP for various operators. Selecting manual, semi- or automatic wrapping. In- or off-line operation. Smooth, easy integration in any packaging process
- **Film carriages:** choice from mechanical film brake up to a sophisticated 400%, 2-motors power pre-stretch
- **Films:** process all quality stretch & pre-stretched films, from 8 up to 23 microns
- **Performance:** reliable, stable and consistent. Minimal downtime, offering optimal film consumption & product protection, during storage and transport
- **Options:** unlimited number of options

Special Solutions

Automated, One-stop Strapping & Wrapping

- **Integration:** smooth and easy integration & operation for in- or off-line operation.
- **Combination:** compact combination of the best; FS2000 with unique **Æ**olus™ film attaching and cutting & PM500200 plastic strapping.
- **Film carriages:** of choice, with one or two motor power pre-stretch, up to 350%. processing quality stretch films, between 8 up to 23 microns.
- Options: Wide choice of options and standard or custom-made solutions.
- Improved productivity: and ergonomics with Calculated cost reductions

Vertical Wrapping

EasyWrap™ Vertical Wrapping, Light (FV)

- **Operation & Integration:** Easy to operate and to integrate. Both, in- or off-line, in any kind of packaging station. Ring diameters 50, 90, 125, 160, 200, 250 cm
- **Products:** Flexible Semi- and full-automatic wrapping of a wide range of straight, regular, irregular and round products
- **Capacity:** High throughput by the unique Double-film carriage construction with mechanical film brake. Up to 2x faster than conventional machines.
- **Processes:** Stretch films, from 17 up to 30 microns and PaperWrap™ Kraft stretch paper ~30%, or a combination thereof

FROMM | PROTECTING SOLUTIONS

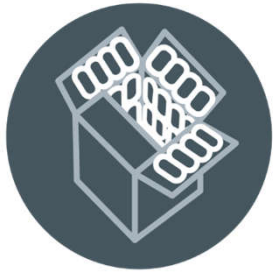

Main drivers in Protective Packaging

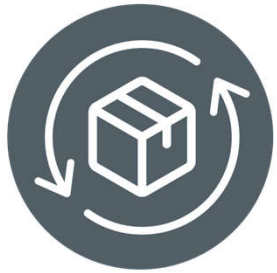

Sustainability Solutions

Protecting Solutions

Productivity and working conditions

Process control and automation

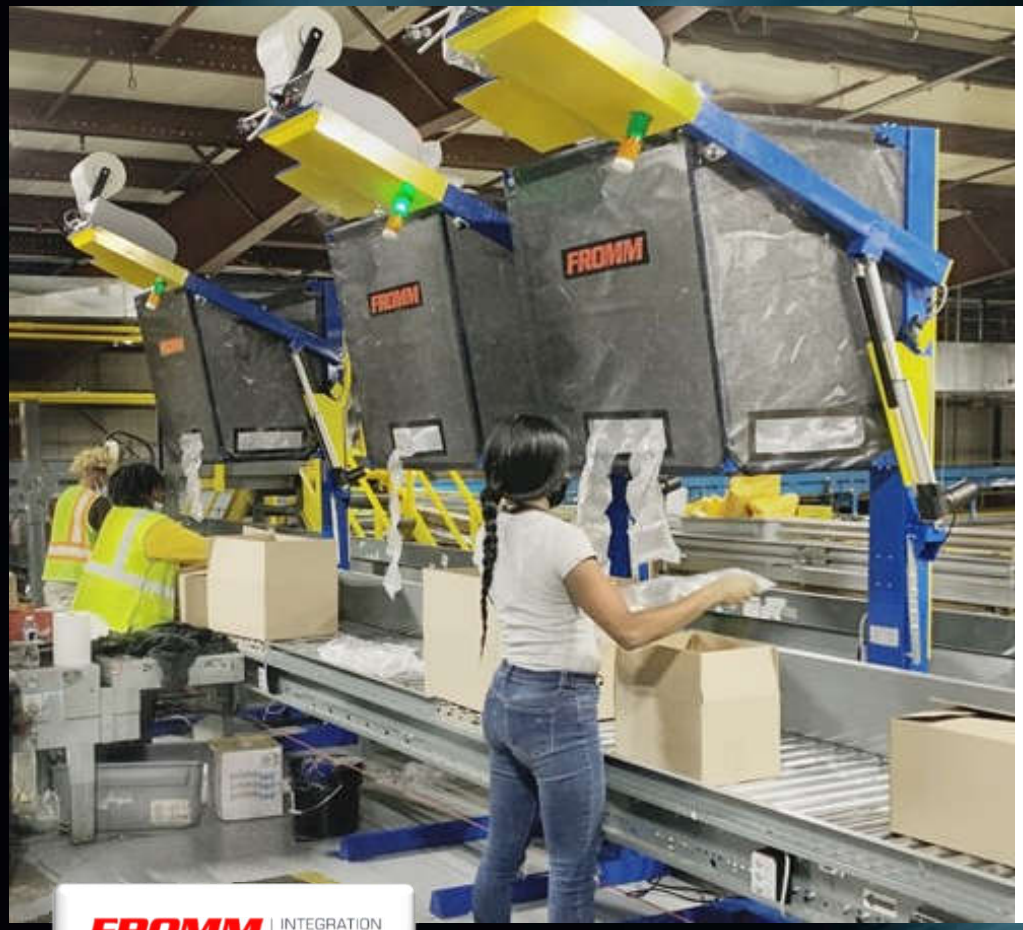

Airpad™ BY FROMM

Paperpad BY FROMM

Air-cushion & compact Paper System

- PE based with >50% recycled content
- Biodegradable
- Airpad Paper, recyclable with paper
- 100% recycled paper

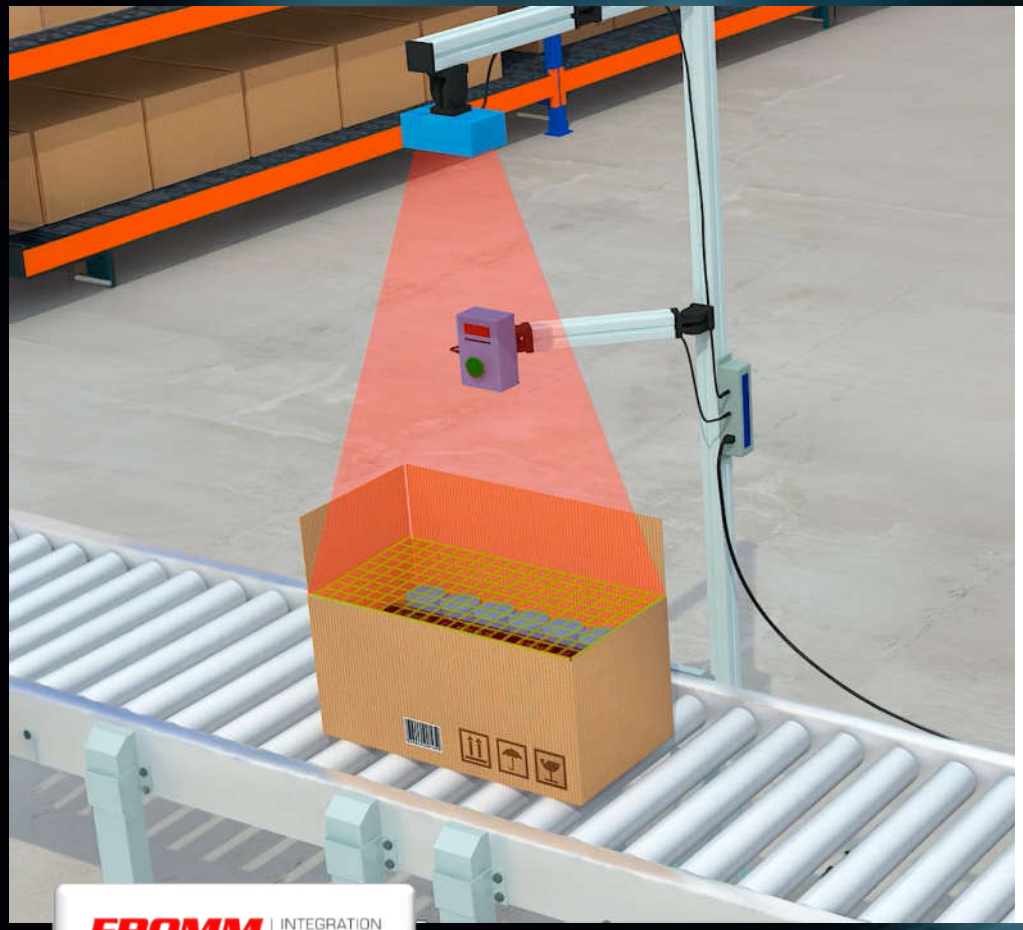

Integration Solutions

Various accessories to

- Optimize packer's efficiency
- Improve working conditions

Custom designed solutions

- Airpad™ systems
- Paperpad™ systems

Process Control & Automation

- SmartFill Scanner for Efficient void fill calculation
- Separator for automatic dispensing

- streng vertraulich -

FROMM | AUTOMATED SOLUTIONS

Automated Strapping Solutions

Full range for Steel and Plastic Strapping

- For round, hexagonal, bundled or flat packages. Transversal, longitudinal, circumferential or radial straps

Semi-Automatic Strap Feeders

- A wide range of different infeed systems in any desired size. Designed to facilitate and optimize the use of FROMM strapping tools

Retrofits

- Modernizing existing production lines can save costs quickly and easily. In addition to higher system reliability, it also offers better packaging quality and a shorter cycle time.

SOLUTIONS
INTELLIGENT
INNOVATIVE
INTERACTIVE
by FROMM
since 1947

Automated Octomeca Wrapping Solutions

5 Advanced load securing platforms, offering optimal load stability, protection and operational safety

1. **Horizontal wrapping** (OMC-H series), 4- or 5-sided protection. Ideal for palletized or grouped goods in logistics centers and OEMs.
2. **Vertical wrapping** (OMC-V and VO series), 6-sided protection. Best suited for long loads.
3. **Radial wrapping** (OMC-R series), full 360° coverage. Optimal for cylindrical items such as paper rolls.
4. **Linear wrapping** (OMC-CW series), 5-sided weatherproof. For long, even loads such as stacked lumber.
5. **Through-the-eye wrapping** (Silma), specialized full-surface protection for sheet metal coils.

FROMM | PACKAGING SYSTEMS

Manufacturing Tools & Consumables

Manufacturing & Distribution

Strapping Tools & Machines

High tech manufacturing & assembly

- High-tech precision production
- High-quality standards
- ISO Certified
- Sustainable processes and procedures
- Using solar energy, generating up to 40% of the energy consumption = CO_2 emission free.
- Almost Zero waste to landfill.

Plastic Strapping

FROMM high-performance plastic straps are produced on four continents in six different state-of-the-art plastics manufacturing facilities in Brazil, Chile, Germany, India, Thailand, and the USA.

Airpad Films, production & customizing

Both R&D as well as production and customizing of Airpad films takes place in the modern ISO & EcoVadis certified plastic factory in Kölleda, Germany.

Steel strap

Metals Solutions Dynaflex, Megadyn, Megadyn Plus and USLM quality steel straps for general purpose, high strength, high elongation & lashing applications are produced in one of Europe's largest vertical integrated steel strap manufacturing plants.

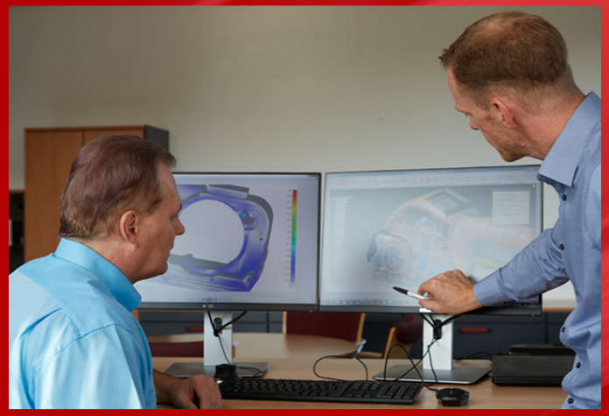

Seals

In its plants in Greece and the USA, FROMM produces a series of high-performance metal seals for all steel strap types, tools and applications. Ensuring consistent high seal efficiency and secure shipments.

Research & Development

Investing in future technologies

Modern R&D facilities

with extensive testing capabilities.

Innovations focussed on Durability, Serviceability, Efficiency, Automation, Monitoring, Sustainability and Greener materials

- Sealless steel strap seal, first to market
- Pneumatic seal action in J1 strapping tool
- Airpad™, separated air chambers and tear
- Common strap inlay, P3xx plastic strapping tools
- MicroLock™ Sealless safety seal, steel strap
- Colour touch screen S-series plastic strapping tools, with the "Keep it Smart" service App, for wireless updating and service history
- Steel strap Spot welding
- Eco-S light weight PET strap, saving up to 20% PET
- PET Strap to Strap recycling
- Coil Wrapping (Silma) & Strapping

Quality

is our Trademark

FROMM Quality Principles

Upholding our family principles of quality and social responsibility, without compromise.

Customer satisfaction by mutually profitable relationships – Ensuring long-term success by learning, anticipating and continuously working to exceed our internal and external customers' needs and expectations;
Constant improvement and innovation – Continuing to improve based upon efficient business processes, well-defined measurements and best practices, never accepting the status quo as the best we can do;
Do it right the first time – Meeting current requirements using established procedures. Our goal is to complete each task without rework;
Open communication – Free exchange of information necessary to achieve common goals; Develop staff competencies, creativity, empowerment and accountability through appropriate development programs and show strong management involvement and commitment;
Teamwork – Cooperative effort toward common goals.
Proximity - a consistent personal approach Always close to our customers
Meeting or exceeding industrial standards by applying advanced technologies

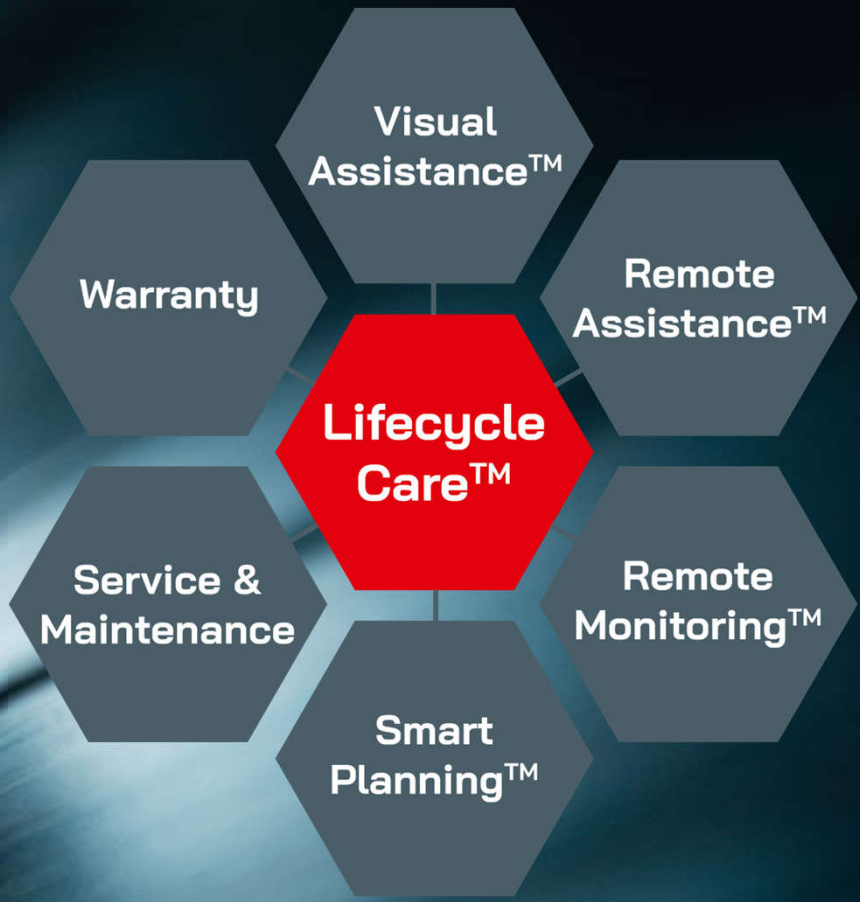

FROMM | PACKAGING SYSTEMS

Comprehensive Service Package

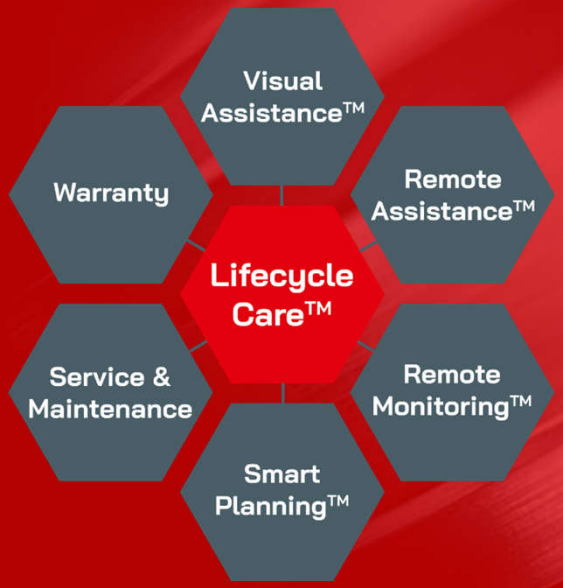

Smart Service Concept

by FROMM – since 1947

Warranty & Service Solution

Structured service concept

From start to finish

- Enabling an extended service life
- For the lowest possible TCO and the highest possible reliability
- System performance monitoring for online support and active service planning
- Visual Assistance, life visual online service back-up
- Extended warranty programs for all FROMM* solutions
- Spare parts stock and supply management

FROMM | PACKAGING SYSTEMS

Our Commitment

Sustainability by FROMM

A Journey of Continuous Improvement

Production	Products	Recycling
Zero waste to landfill	Wrapping with up to **400 %** Stretch potential	Strapping meets or **exceeds** highest industry standards
High vertical integration	Strapping with up to **100 %** recycle share	**Closed loop** Strap to Strap recycling
> 95 % waste sorting rate	Protecting with up to **99 %** Air	
Solar power **> 40 %** CO_2-emission-free		

Sustainability by FROMM

Our Journey to a Sustainable Society

- The **UN Sustainable Development Goals** are17 global targets set in 2015, to address challenges like poverty, inequality, and climate change by 2030.
- They offer **a shared framework** for governments, businesses, and communities to work towards **a more sustainable world**.
- FROMM Holding AG decided to use **the SDGs as a roadmap** to align our strategies, set measurable goals, and **drive positive impact**.
- **By integrating the SDGs** into our operations, we can **create value, foster innovation, and contribute to global progress** while enhancing our long-term success.
- **We understand** that integration is **a gradual process** and consider internal motivation and support as essential elements for achieving our goals.
